What you are doing

Activity 5 traced the perception gap mostly to Value Quality — the feeling of being known — rather than to the product itself. That is, in one sense, good news: it means Nimbus already has the raw material to fix it. The same loyal-customer Facebook community that has been asking "why hasn't Nimbus gone green sooner?" is still active, still buying, and still willing to talk about the brand.

What you will produce: An advocacy strategy mapped to the Advocacy Loop, naming target advocates, the loop stage it strengthens, the ask, and tracked metrics.

The scenario

The founder now wants the relaunch to lean on these genuine advocates rather than paid media alone. But the online review picture is mixed — some customers are clearly still delighted, others are the ones driving the "doesn't feel personal anymore" narrative, and a few are firmly on the fence.

Your table's job is to read the available feedback, identify who the real advocates are, and design an advocacy assessment and strategy that strengthens the loop before the anniversary campaign goes live — without ignoring the risk that a negative experience could restart the narrative that hurt Nimbus six months ago.

Your steps

1. **Draw the Advocacy Loop** — Sketch the loop: Satisfied → Loyal → Advocate → Influences a new customer → back into Awareness. You are looking for where Nimbus's loop breaks before it reaches a new customer.
2. **Define what separates an advocate from a satisfied customer** — Agree the evidence test at your table BEFORE sorting anyone. Satisfied customers are happy; advocates take unprompted public action on the brand's behalf — they post, review, recommend, defend. Repeat purchase alone is loyalty, not advocacy.
3. **Sort the mixed feedback into three groups** — Read the supplied feedback and sort into: genuine advocates, on-the-fence, and the critics driving the 'doesn't feel personal' narrative. Record the specific evidence that put each customer in their group.

4. **Find the break point in the loop** — Mark where Nimbus is strongest and where the loop breaks. The green-packaging community is a strong signal — they are advocating and asking for more, which means the break is usually not at Satisfied or Loyal but at the point where advocacy is never invited or amplified.
5. **Design the ask** — Decide what you would genuinely ask advocates to do for the relaunch — and be specific. 'Share our post' is weak; 'tell us what nearly made you leave, on the record' is a real ask that also produces insight.
6. **Design the reciprocal offer** — Write what Nimbus gives in return so the exchange feels genuine, not transactional. Early access, a voice in the packaging decision and public credit outperform discount codes, which convert advocates into bargain hunters.
7. **Build the risk guard** — A competitor's viral moment caused the original damage. Write one safeguard for what happens if an advocate has a bad experience during the campaign — who responds, how fast, and through which channel.
8. **Name the metrics** — At least two target metrics with how each will be tracked and by whom. Advocacy metrics should measure action taken, not sentiment felt.

Your working space

Complete every field. You may keep this worksheet and refer to it during the open-book assessment.

Step 1 — Draw the Advocacy Loop

Step 2 — Define what separates an advocate from a satisfied customer

Step 3 — Sort the mixed feedback into three groups

Step 4 — Find the break point in the loop

Step 5 — Design the ask

Step 6 — Design the reciprocal offer

Step 7 — Build the risk guard

Step 8 — Name the metrics

Answers to the discussion prompts

1. Reading the mixed feedback, which customers are the strongest genuine candidates for an advocacy programme, and what evidence marks them out from a merely satisfied customer?

2. Using the Advocacy Loop, at which stage is Nimbus currently strongest, and at which stage does the loop most often break down before it reaches a new customer?

3. Given that a competitor's viral moment is what hurt Nimbus six months ago, how real is the risk that one bad experience among these advocates could restart the same narrative — and how would you guard against it?

4. What would you actually ask advocates to do for the relaunch, and what would Nimbus need to give them in return for it to feel genuine rather than transactional?

Reflect & discuss

Did your table pick advocates based on how loudly they post, or on how consistently satisfied they actually are?

Which stage of the Advocacy Loop did your table find hardest to strengthen with the resources Nimbus realistically has?

If one of your chosen advocates had a bad experience next week, would your strategy survive it?

Check your work

Every group can show an advocacy strategy mapped onto the Advocacy Loop, naming which customers to engage, what stage of the loop it strengthens, and at least one target metric with how it will be tracked.
