Self-check — Campaign Documentation Audit

Tick each item you have completed. Any blank is a gap to close before your group presents at the debrief.

#	Criterion	Evidences	✓
1	All four pilot elements are sorted into PESO with the boosted post correctly Paid.	LU2	
2	Each PESO category has at least one reception metric, not just a volume metric.	LU2	
3	Missing data is explicitly flagged rather than glossed over.	LU2	
4	The effort-vs-reception mismatch is identified.	LU2	
5	The framework names fields, an owner, a cadence and a storage location.	LU2	

Debrief check

Every group can show a PESO-sorted reception report for the pilot campaign with at least one metric per media type, the gaps in current data called out honestly, and a reusable documentation framework for the full relaunch.
